NAME Xing Tao

CLASS OF 2003

SCHOOL OF (Department) Information Science and Engineering

MAJOR IN Computer Science and Technology

Explanation of the Grade System:

1.For the courses, in which a final examination (or its equivalent,e.g.,a paper after a thorough study on some subjects or a report of a detailed experimental investigation on some subjects) is given,the percentage system with "100" as full grade and "60" as passing grade is usually used.The five-level grading system(A:Excellent,90-100;B:Good,80-89;C:Medium,70-79;D:Passed,60-69;E:Failed,<60) is sometimes used instead,if the instructor prefers.

2.For those courses,in which no final examination is given,it is considered adequate to use a two-level grading system (Passed or Qualified and Failed) to record the quality of study.
